INTRODUCTION TO THE MAJOR
Bioengineering is the application of engineering principles to biological systems. Students in the Bioengineering major study math, physics, chemistry, and biology, in addition to computer sciences, electrical and mechanical engineering, and/or materials sciences. They bring these skills together in bioengineering courses where they learn to analyze, understand, repair, and alter biological materials and systems. Collaboration and interdisciplinary perspectives are key skills we encourage in all of our students, and we prize cooperation over competition whenever possible. BioE graduates pursue successful careers in industry, further study in medical school, and graduate studies in bioengineering and related disciplines at top universities.

THE FUTURE OF BIOLOGY. THE FUTURE OF ENGINEERING.
Our curriculum provides a strong foundation in engineering and the biological sciences, with the freedom to explore a variety of topics and specialize in advanced areas of research. All students take bioengineering fundamentals courses in areas such as biomechanics, instrumentation, and computational biology, and choose from a growing list of bioengineering topics for specialized advanced coursework. In addition, students will take BioE laboratory courses and complete a design or research project under faculty supervision. Students can pursue a concentration in Biomedical Devices; Biomedical Imaging; Cell & Tissue Engineering; or Synthetic & Computational Biology.

AMPLIFY YOUR MAJOR
- Engage in undergraduate research on a faculty-initiated project or your own research topic.
- Get teaching experience as an Undergraduate Student Instructor or DeCal facilitator.
- Berkeley offers a wealth of opportunities, from supplemental classes like Bioprinting @ Berkeley to the Summer Biodesign Immersion Experience, and the Fung Fellowship in wellness and technology.

” Bioengineering faculty care about my learning and success both as a student and as a future professional. ”
– Bioengineering student

HOW TO USE THIS MAP
Use this map to help plan and guide your experience at UC Berkeley, including academic, co-curricular, and discovery opportunities. Everyone’s Berkeley experience is different and activities in this map are suggestions. Always consult with your advisors whenever possible for new opportunities and updates.

Visit ue.berkeley.edu/majormaps for the latest version of this major map.

CONNECT WITH US
Cal Day
Come to UC Berkeley’s annual Open House in April for information sessions, campus tours, special talks, and more. BioE’s Cal Day website.

Golden Bear Orientation
Join your peers in the campus-wide UC Berkeley orientation program for all new students.

Events
Attend department events with students, faculty, and staff. Visit bioeng.berkeley.edu for news and updates.

ADVISING
Set an appointment or drop-in to meet with a Bioengineering undergraduate adviser.

Advising Appointments available:
Tuesday - Friday, 9:30 - 11:30am
Tuesday - Thursday, 1:15 - 4:00pm

Advising appointments will primarily meet via Zoom. In-person advising available on Thursdays or by appointment, when needed.

Appointments can be made via email at mariselal@berkeley.edu. It is strongly recommended you email to schedule an appointment.

# Bioengineering Design Your Journey

## Bachelor of Science

### First Year
- **Explore your major**
  - Review the Bioengineering concentrations and general degree requirements.
  - Take first-year BioE classes: BioE 10 & 26
  - Look for classes that spark your interest (such as Freshman Seminars).
  - Choose your concentration.
  - Attend the BioE Town Hall.

- **Connect and build community**
  - Meet other bioengineers at events and student groups like BioEHS and BMES.
  - Go to office hours and study groups (SLC, ESS).
  - Seek mentorship from upper division students.
  - Get help if you need it and respect your limits.

- **Discover your passions**
  - Find opportunities in BioE Announcements.
  - Go to the BioE weekly Announcements to get inspired.
  - Read about faculty research in Bioengineering, but don't worry about joining a lab your first year.

- **Engage locally and globally**
  - Interested in studying abroad later? Check out the requirements now.
  - Explore volunteering opportunities on campus.
  - Apply for study abroad.
    - Prime time for volunteering in the community - check out PIE, BEAM, BioEHS.
    - Apply to NSF Research Experience for Undergraduates (REU) and internship programs.

### Second Year
- **Explore your major**
  - Finish lower division courses.
  - Talk with adviser(s) and use the multi-year teaching plan to plan your prerequisites and classes.
  - Considering a minor or summer minor? Sketch out how it'll fit into your 4-year plan.
  - Attend the BioE Town Hall.

- **Connect and build community**
  - Keep going to office hours and study groups to build your connections.
  - Get to know faculty and grad students at professor lunches, Town Hall, research exhibitions, etc.
  - Gain leadership experience in student organizations and ESS.

- **Discover your passions**
  - Plan for research. Make a resume, talk to faculty.
    - Into health entrepreneurship? Apply for the Fung Fellowship.
    - What kind of problems do you want to solve? Start thinking about how they relate to potential careers and what skills you’ll need.

- **Engage locally and globally**
  - Find opportunities to pursue your passions that go beyond campus, such as a Berkeley Global Internship, community volunteering, or independent project.
  - Apply for fellowships available to recent Berkeley graduates.
  - Explore gap year opportunities prior to embarking on your next academic or career adventure.

### Third Year
- **Explore your major**
  - Choose classes from your concentration that will build the career skills you need.
  - Check in with a major and college adviser on degree progress.
  - Plan time for non-major courses on your bucket list.
  - Attend the BioE Town Hall.

### Fourth Year
- **Explore your major**
  - Meet with your major and college adviser to ensure you are fulfilling all major, college, and campus requirements.
  - Take the Bioengineering Capstone Design course if you haven’t fulfilled your Design Requirement.
  - Attend the BioE Town Hall.

### What Can I Do With My Major?

#### Jobs and Employers
- Clinical Research Coordinator, UCSF
- Engin. Tech., Verily Life Sciences
- Junior Specialist, UC Berkeley
- Optometric Asst., Golden Gate Opt.
- Process Engineer, Illumina
- Research Asst., Innovative Genomics
- Research Fellow, ETH Zurich
- Scientific Lab Asst., Adv. Clinical Software Developer, IBM
- Software Engineer, Capital One
- Software Engineer, Google
- System Engineer Assoc., IRhythm
- Systems Engineer, Bio-Tech Connect Technical Services, Epic Systems
- Wireless Engineer Intern, Kaiser

#### Graduate Programs
- Biological Sciences
- Biomedical Engineering
- Chemical Engineering
- Computer Science
- Genetics
- Medicine
- Molecular Biology
- Natural Resources Mgmt & Policy
- Neurobiology

### Examples gathered from the First Destination Survey of recent Berkeley graduates.
